SUMMARY

Full Stack Developer with 5+ years of professional experience designing, developing, deploying, and maintaining web applications and e-commerce platforms. Strong backend expertise in PHP and Laravel, combined with frontend development using JavaScript, HTML5, CSS3, React, and Tailwind CSS.

Experienced in building REST APIs, e-commerce solutions, payment gateway integrations, database-driven applications, SEO optimization, performance improvements, and Linux-based deployments. Hands-on experience with AWS, GitHub Actions, CI/CD, Apache, MySQL, third-party APIs, and cloud infrastructure.

Focused on building scalable, maintainable, and business-oriented solutions, from requirements and architecture through development, deployment, and production optimization.

EXPERIENCE

Full Stack Developer | January 2022 – 2026

CRATERONFIRE | Guadalajara, Jalisco, Mexico

- Designed and developed web applications using PHP, Laravel, MVC architecture, JavaScript, and MySQL.
- Implemented and maintained scalable REST APIs consumed by frontend applications and external services.
- Developed and maintained e-commerce platforms, including product catalogs, shopping carts, checkout processes, order management, and payment integrations.
- Integrated payment gateways such as PayPal and Conekta, including payment processing and API communication.
- Designed database structures and implemented SQL queries for transactional and business-critical applications.
- Implemented webhooks and API-based integrations for asynchronous communication between systems.
- Improved application performance through backend optimization, database query improvements, caching strategies, and frontend optimization.
- Implemented technical SEO strategies, including semantic HTML, metadata, canonical URLs, XML sitemaps, robots.txt, and search engine optimization.
- Collaborated with designers, clients, and stakeholders to transform business requirements into functional and scalable software solutions.
- Used Git and GitHub for version control and collaborative development workflows.
- Troubleshooting and resolving production issues involving APIs, databases, payment processing, server configuration, and application performance.

Full Stack Web Developer | January 2021 – Present

FREELANCE | Jalisco, Mexico

- Design, develop, deploy, and maintain custom websites and e-commerce platforms for clients.
- Develop complete web solutions from UI/UX implementation and frontend development to backend architecture, database design, server configuration, and production deployment.
- Build e-commerce applications using PHP, JavaScript, MySQL, HTML5, and CSS3.
- Implement shopping carts, product catalogs, variants, inventory management, orders, checkout flows, and customer-facing features.
- Integrate external services and APIs, including payment, shipping, invoicing, email, and business automation platforms.
- Develop and integrate payment solutions using PayPal and Conekta.
- Configure and deploy applications on Linux VPS environments using Apache, PHP, MySQL, SSL, and DNS.
- Configure cloud infrastructure and deployment workflows using AWS S3, CloudFront, GitHub Actions, and CI/CD pipelines.
- Implement automated deployment workflows from GitHub to cloud infrastructure.
- Optimize websites for SEO, accessibility, performance, and Core Web Vitals.

- Implement technical SEO features such as structured page architecture, canonical URLs, XML sitemaps, robots.txt, metadata, and Google Search Console integration.
- Optimize frontend performance by reducing render-blocking resources, optimizing assets, improving loading strategies, and reducing unnecessary requests.
- Implement analytics and marketing integrations using Google Tag Manager and dataLayer events.
- Maintain and troubleshoot production environments, including Apache, PHP-FPM, SSL certificates, DNS, server logs, API failures, and database issues.
- Configure transactional email integrations and troubleshoot email API, attachment, payload-size, and timeout issues.
- Work directly with clients to understand requirements, define technical solutions, and deliver projects from development through production.

EDUCATION

UNIVERSIDAD DE GUADALAJARA

Bachelor's Degree in Telematics Engineering 2015 – 2020 | Ciudad Guzmán, Jalisco, Mexico

PROJECTS

E-commerce Platform — Cien Años Café | Full Stack Developer

<https://cafecien.shop/>

- Designed and developed a complete e-commerce platform for a coffee brand with an established online business.
- Built the application architecture using PHP, MVC, JavaScript, MySQL, HTML5, and CSS3.
- Implemented product catalogs, product variants, inventory, shopping cart, checkout, orders, and payment processing.
- Integrated third-party services for payments, shipping, email, and business operations.
- Implemented Google Tag Manager dataLayer events for marketing and conversion tracking.
- Implemented technical SEO including sitemap.xml, robots.txt, canonical URLs, metadata, and Google Search Console.
- Optimized website performance and Core Web Vitals, achieving fast initial rendering and improved page loading performance.
- Managed production deployment and server infrastructure on a Linux VPS with Apache, PHP, MySQL, SSL, and DNS.

Cloud Deployment & CI/CD | AWS / GitHub Actions

- Designed deployment workflows for frontend applications using GitHub Actions and AWS.
- Configured AWS S3 and CloudFront for static website hosting and global content delivery.
- Implemented automated deployment pipelines triggered by GitHub changes.
- Configured AWS IAM roles and GitHub Actions OIDC authentication for secure deployments.
- Worked with AWS services including S3, CloudFront, API Gateway, Lambda, and SES as part of cloud-based web architectures.

TECHNICAL SKILLS

Backend: PHP

Backend: Laravel

Backend: MVC Architecture

Backend: REST APIs

Backend: SOAP APIs

Backend: API Integration

Backend: Authentication & Authorization

Backend: Webhooks

Backend: Payment Gateway Integration

Frontend: JavaScript ES6+

Frontend: HTML5
Frontend: CSS3
Frontend: React
Frontend: Astro
Frontend: Tailwind CSS
Frontend: Responsive Web Design
Frontend: DOM Manipulation
Databases: MySQL
Databases: SQL
Databases: Database design & optimization
Databases: phpMyAdmin
Cloud, DevOps & Infrastructure: AWS
Cloud, DevOps & Infrastructure: Amazon S3
Cloud, DevOps & Infrastructure: Amazon CloudFront
Cloud, DevOps & Infrastructure: API Gateway
Cloud, DevOps & Infrastructure: AWS Lambda
Cloud, DevOps & Infrastructure: Amazon SES
Cloud, DevOps & Infrastructure: GitHub Actions
Cloud, DevOps & Infrastructure: CI/CD
Cloud, DevOps & Infrastructure: Linux
Cloud, DevOps & Infrastructure: Apache
Cloud, DevOps & Infrastructure: VPS deployment
Cloud, DevOps & Infrastructure: SSL/TLS
Cloud, DevOps & Infrastructure: DNS configuration
Performance & SEO: Technical SEO
Performance & SEO: Core Web Vitals
Performance & SEO: PageSpeed optimization
Performance & SEO: Caching
Tools & Workflow: Git
Tools & Workflow: GitHub
Tools & Workflow: Postman

ADDITIONAL TECHNICAL EXPERIENCE

Linux server administration · Apache configuration · PHP-FPM · SSL/TLS certificate configuration · DNS management · Git-based deployment workflows · API debugging with Postman · Production troubleshooting and log analysis · Database optimization and SQL debugging · Third-party API integrations · Webhooks · Payment processing · Transactional email systems · Technical SEO · Web performance optimization · Responsive web development · CI/CD automation

LANGUAGES

Spanish: Native
English: Intermediate (B1–B2)
